

Hi, I'm Naeem Khan!
I'm a full-stack
developer
and network & security
enthusiast.

Skills

Here's a list of things I am most profecient in. For a full list, please check out my [CV here](#).

Front End Development

I have worked on several different website projects and I have experience building websites from scratch using HTML, CSS and JavaScript.

Back End Development

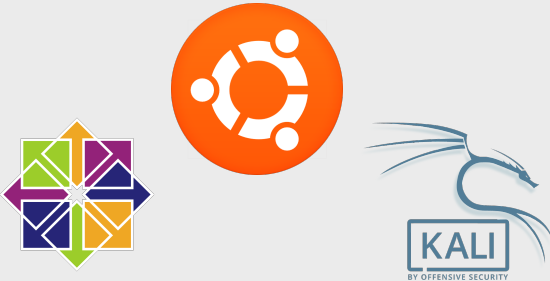

Whether it is website or software development, Python is my go-to programming language. I also enjoy working with PHP.

Database

For relational database management, I use MySQL and PostgreSQL extensively. I also have experience working with Google's Firebase and Firestore.

Operating Systems

I have worked with a number of different linux distributions for several years and I'm familiar with both desktop and server versions of many linux distros.

Selected Projects

Here are a few projects that I have worked on. For a full list of projects, please visit the [Projects page](#).

Global Health Management System

Portfolio
Website

WPI-CTF-2020
Write up

Buffer Overflow (Stack-based)
Attack on Windows 10
